---

---

## About

GT Cinetype is based on a design engineered for a cinema subtitling machine. By using a laser to erase the color layer of the film, very small and brilliantly white letters appear. The laser can only move in straight lines, so the typeface contains no curves.

Background

The Swiss company Cinetype AG was specialized in subtitling cinematic movie reels. A laser set the type directly on the film by erasing the coloured layer of the film. Our interpretation of that leads to a typeface with mechanic precision, but also a human element, that shows its personality in the details. Used in small sizes GT Cinetype seems like a normal, rounded typeface. The eye will only perceive its straight segments at larger sizes. The design of GT Cinetype is the result of restrictions set by the laser's limited tracking capabilities. Due to the possibility of digital subtitles and movie delivery in general, this process has since become obsolete. The digitalisation of this typeface is our way of capturing the spirit of this area of typesetting.

Shape

Origin

From laser pathing to the projection, and the final vector pathing.

Sizes

While very distinctive in big sizes, the rough outline segments become barely visible in smaller sizes due to ink bleeding in print and pixel rendering on screens.

Features

---

Form

The counters and the aperture are designed as big as possible to improve legibility even in difficult conditions.

Contrast

The typeface is almost mono-line with slight contrast and tapering.

The way your dad looked at it, this watch was your birthright. He'd be damned if any slopes gonna put their greasy yellow hands on his boy's birthright, so he hid it, in the one place he knew he could hide something: his ass. Five long years, he wore this watch up his ass. Then when he died of dysentery, he gave me the watch. I hid this uncomfortable piece of metal up my ass for two years. Then, after seven years, I was sent home to my family. And now, little man, I give the watch to you.

I ain't saying it's right. But you're saying a foot massage don't mean nothing, and I'm saying it does. Now look, I've given a million ladies a million foot massages, and they all meant something. We act like they don't, but they do, and that's what's so fucking cool about them. There's a sensuous

thing going on where you don't talk about it, but you know it, she knows it, fucking Marsellus knew it, and Antwone should have fucking better known better. I mean, that's his fucking wife, man. He can't be expected to have a sense of humor about that shit. You know what I'm saying?

6 pt

There's a passage I got memorized. Ezekiel 25:17. "The path of the righteous man is beset on all sides by the inequities of the selfish and the tyranny of evil men. Blessed is he who, in the name of charity and good will, shepherds the weak through the valley of the darkness, for he is truly his brother's keeper and the finder of lost children. And I will strike down upon thee with great vengeance and furious anger those who attempt to poison and destroy My brothers. And you will know I am the Lord when I lay My vengeance upon you." Now... I been sayin' that shit for years. And if you ever heard it, that meant your ass. You'd be dead right now. I never gave much thought to

what it meant. I just thought it was a cold-blooded thing to say to a motherfucker before I popped a cap in his ass. But I saw some shit this mornin' made me think twice. See, now I'm thinking: maybe it means you're the evil man. And I'm the righteous man. And Mr. 9mm here... he's the shepherd protecting my righteous ass in the valley of darkness. Or it could mean you're the righteous man and I'm the shepherd and it's the world that's evil and selfish. And I'd like that. But that shit ain't the truth. The truth is you're the weak. And I'm the tyranny of evil men. But I'm tryin', Ringo. I'm tryin' real hard to be the shepherd.

The greatest feeling you can get in a gym, or the most satisfying feeling you can get in the gym is... The Pump. Let's say you train your biceps. Blood is rushing into your muscles and that's what we call The Pump. You muscles get a really tight feeling, like your skin is going to explode any minute, and it's really tight - it's like somebody blowing air into it, into your muscle. It just blows up, and it feels really different. It feels fantastic. I don't have any weak

points. I had weak points three years ago, but my main thing in mind is, my goal always was, to even out everything to the point... that everything is perfect. Which means if I want to increase one muscle a half inch, the rest of the body has to increase. I would never make one muscle increase or decrease, because everything fits together now, and all I have to do is get my posing routine down more perfect, which is almost impossible to do, you know.

THE TERMINATOR: *Phased plasma rifle* in the 40-watt range.  
PAWN SHOP GUY: Hey, just what you see, pal!

THE TERMINATOR: [Looks around] The *Uzi nine millimeter*.

THE TERMINATOR: [Pointing the *12-gage shotgun* towards the door] All.  
PAWN SHOP GUY: I may close early today. There's a 15-day wait on the hand guns but the rifles you can take right now.  
PAWN SHOP GUY: And you have to fill these out too. [Takes out forms]

Size matters not. Look at me. Judge me by my size, do you? Hmm? Hmm. And well you should not. For my ally is the Force, and a powerful ally it is. Life creates it, makes it grow. Even between the land and the ship.

Give yourself to the Dark Side. It is the only way you can save your friends. Yes, your thoughts betray you. Your feelings for them are strong. Especially for... sister. So, you have a twin sister. Your feelings have now betrayed her, too. Obi-Wan was wise to hide her from me. Now his failure is complete. If you will not turn to the Dark Side... then perhaps she will... Everything that has transpired has done so accor-

ding to my design. Your friends, up there on the sanctuary moon, are walking into a trap, as is your Rebel fleet. It was \*I\* who allowed the Alliance to know the location of the shield generator. It is quite safe from your pitiful little band. An entire legion of my best troops awaits them. Oh, I'm afraid the deflector shield will be quite operational when your friends arrive.

It is a dark time for the Rebellion. Although the Death Star has been destroyed, Imperial troops have driven the Rebel forces from their hidden base and pursued them across the galaxy. Evading the dreaded Imperial Starfleet, a group of freedom fighters led by Luke Skywalker has established a new secret base on the remote ice world of Hoth. The evil lord Darth Vader, obsessed with finding young Skywalker, has dispatched thousands of probes into the far reaches of space...

Luke Skywalker has returned to his home planet of Tatooine in an attempt to rescue his friend Han Solo from the clutches of the vile gangster Jabba the Hutt. Little does Luke know that the GALACTIC EMPIRE has begun construction on a new armored space station even more powerful than the first dreaded Death Star. When completed, this ultimate weapon will spell certain doom for the small band of rebels struggling to restore freedom to the galaxy...

7.5 pt Is a motion picture film format that uses exactly the same film stock as standard 35 mm film, but puts a larger image frame on that stock by using the space normally for the optic analog sound track. Super 35 was revived from a similar Superscope variant known as Superscope 235, which was originally developed by the two Tushinsky Brothers (who founded Superscope Inc. in 1954) for RKO in 1954. When cameraman Joe Dunton was preparing to shoot Dance Craze in 1982, he chose to revive the Superscope format by using a full silent-standard gate and optically recentering the lens port. These two characteristics are central to the format.
